Akbank chooses RayVentory as a solution for Technology Asset Inventory

Istanbul, Turkey – Raynet, global software vendor with market-leading solutions and managed service provider in the field of Enterprise Software Management, announces that Akbank, one of the largest private banks in Turkey, has selected RayVentory as their Technology Asset Inventory solution. Akbank now manages their discovery and inventory processes for IT Assets with RayVentory, integrating directly with Akbank's existing IT landscape.

"We could see that RayVentory was a great fit and we saw that the wide variety of scanning methodologies would meet our needs as our infrastructure changes and technology inventory grows," says Bülent Saltürk, Senior Vice President of IT Infrastructure and Operations at Akbank. "As being the pioneer of digital banking in Turkey we are convinced that RayVentory will enable us to embrace the future more confidently via providing a robust and complete picture of our technology assets."

RayVentory initially will be deployed for Oracle, Microsoft, IBM, VMware, Oracle, and AQT.

With a strong and extensive domestic distribution network of 770 branches staffed by more than 12 thousand employees, Akbank operates from its headquarters in Istanbul and 21 regional directorates across Turkey. In addition to providing services at branch locations, its traditional delivery channel, Akbank also serves close to 18 million customers via the Akbank Internet Branches, Akbank Mobile, the Call Center, 5,000 ATMs and more than 600 thousand POS terminals as well as other high-tech channels.

"With the use of RayVentory to manage its discovery and inventory processes, Akbank will not only have a complete transparency across all technology assets, but it will also have the means to more effectively and economically manage the digitalization initiatives which will be undertaken," notes Fatih Kılıçaslan, International Business Development Director at Raynet.

Following the mission "Discover to manage", Raynet offers the market unique products covering all enterprise software management processes, used by many Forbes Global 2000 companies.
