

// Oracle Java

Get complete transparency of your Oracle Java installations and avoid costly audits

In 2022 alone **52 %** of Oracle's software compliance and audit activities focused on Oracle Java.

Manage your Oracle Java applications

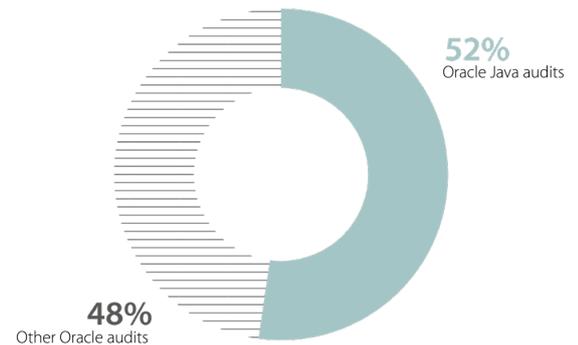

Because of the continuous changes and updates to Java licensing, organizations and enterprises have to maintain a clear and complete overview of their licenses to keep ahead of Oracle audits.

But enterprises aren't just focused on mitigating compliance and financial risks – because: According to a survey from the Software Improvement Group, 90% of organizations pay for more Oracle Java licenses than they actually need.

Continuous & automatic monitoring of Oracle Java

With the Unified Data Platform, you can inventory your entire IT landscape quickly and receive a complete overview of your Oracle Java applications, enriched with essential data such as installed version, number of installations, actual usage, and location.

Thanks to this and other useful information, you can optimize your licenses quickly and achieve enormous savings.
