Basic Software Management with RayManageSofti

Raynets Software Enterprise Deployment Suite (RayManageSofti) offers the complete set of products to deploy Software and operating systems as well as security- and patch management.

Within the client-based architecture, RMSi uses existing IT hardware to fasten up the implementation as well as to reduce costs for medium and large size companies.

Within the training the participants will learn to work with RayManageSofti. In the beginning the students will get an overview of the product and learn how to get started with RayManageSofti and work with this Software management tool efficiently. All training parts include best practice cases and several practical sessions.

Aim of the training is to enable the participants to work with RayManageSofti every day, as efficient as possible, highly flexible and cost saving.

RayAcademy – The right training for every area

The modular training concept of the RayAcademy offers a variety of qualification and advanced training courses and enables both a complete qualification process and targeted specializations in the area of Application Lifecycle Management.

The academy offers regular training courses for all products and services of Raynet and its partners within the Application Lifecycle Management. Raynet also has the world's first and unique training program in the field of software management and packaging consulting.

As a service provider for learning and training units Raynet develops current scenarios and adapts them to the in-house education management of the customers.

AZAV Certified Training Partner

As an accredited institution under the law on employment promotion, Raynet meets the requirements of the accreditation and licensing regulation for employment promotion – AZAV.

Therefore, Raynet offers measures of continuing education according to the fourth section of chapter three in book three of the Social Code.

About Raynet

Raynet GmbH is a leading and innovative service and solution provider in information technology and specialized in the architecture, implementation and operation of all tasks within Application Lifecycle Management.
