Best Practices for Software Evaluation and Compatibility Check with RayEval

RAYACADEMY[®]

The first step in packaging is the evaluation of key resources, which is the result of evaluation and technical analysis. This includes checking that all required documentation is complete, that all source, configuration, and test files are in the correct format, and that the source media provided matches the documentation provided.

During the course, participants learn the basics of evaluation as well as working and documentation techniques for efficient evaluation.

Building on the knowledge gained, the evaluation theories are put into practice using RayEval, so that the participants are then able to create customer-specific and highly professional documentation of high quality.

Course	EVAL-10 Best Practices for Software Evaluation and Compatibility Check with RayEval
Duration	3 Days
Language	English/German

Training Agenda

Day 1
Basics of software evaluation
Processes and procedures in evaluation
Classification of applications
Detect, isolate and separate middleware
Identify and document system changes
Creation of installation and uninstallation instructions
Recording and documentation of application configurations
Documentation technique
Practical exercises: Environment setup, installation of RayEval

Day 2
RayEval Configuration
Configuration of RayEval projects
Documenting evaluation using RayEval
Working with Virtual Machines
Snapshotting functionality
RayFlow integration: import packages from RayFlow, upload documents to RayFlow Server
Practical exercises: Evaluating a Legacy Setup (EXE) using Virtual Machine

Day 3
Templates creation
Creating custom project configuration
Training summary
Practical exercises
Certification: Theoretical- and practical exam

RayAcademy – The right training for every area

The modular training concept of the RayAcademy offers a variety of qualification and advanced training courses and enables both a complete qualification process and targeted specializations in the area of Application Lifecycle Management.

The academy offers regular training courses for all products and services of Raynet and its partners within the Application Lifecycle Management. Raynet also has the world's first and unique training program in the field of software management and packaging consulting.

As a service provider for learning and training units Raynet develops current scenarios and adapts them to the in-house education management of the customers.

AZAV Certified Training Partner

As an accredited institution under the law on employment promotion, Raynet meets the requirements of the accreditation and licensing regulation for employment promotion – AZAV.

Therefore, Raynet offers measures of continuing education according to the fourth section of chapter three in book three of the Social Code.

About Raynet

Raynet GmbH is a leading and innovative service and solution provider in information technology and specialized in the architecture, implementation and operation of all tasks within Application Lifecycle Management. Raynet's Headquarters is in Paderborn, Germany and has additional locations throughout the region as well as locations in the USA, Poland and the UK.

For more than 20 years, Raynet supports hundreds of customers and partners with its products and solutions for worldwide enterprise application management projects. These include license management, software packaging, software deployment, migrations, client engineering and much more. Additionally, Raynet maintains and cultivates strong partnerships with leading companies in Application Lifecycle Management.
