Migration Training AdminStudio to RayPack

RAYACADEMY[®]

This Course is meant for customers migrating from AdminStudio to RayPack. The students will learn step-by-step how to work with RayPack and how to differ between the two packaging solutions. This includes the handling of the different packaging formats and MSI-packaging. Furthermore, it will be discussed how virtualized Application Packages like Microsoft App-V, VMware ThinApp and Citrix XenApp can be converted.

Goal of the Training is to understand the differences within project formats, of central file repository and the comparison between AdminStudio and RayPack.

Course	PKG-50 Migration Training AdminStudio to RayPack
Duration	3 days
Language	English/German

Content of the training

Day 1	
Differences between AdminStudio and RayPack	File formats and migration from AdminStudio / InstallShield projects to RayPack projects
	Migration of the application shared folder and the project directory
	Using the RayPack component PackRecorder for the repackaging of legacy setups
	Using the RayPack component PackDesigner to adapt existing Windows Installer setups
	Extend and customize repaired installations and correct ICE according to validation results
	Using PackBench and RayPack Studio components to manage and edit packaging projects
	Package virtualization with RayPack
Practical Exercises	Setup of the environment: RayPack and PackBench
	Repackaging of a simple application

Day 2	
Preparation for Repackaging	Creating the data storage
	Defining the default images
	Project documentation
	Copying the RayPack Standalone to a network drive
	Exclusion lists
Repackaging	Best Practices of PackRecorder
	Using the PackRecorder UI
	The PackRecorder file menu
	Using PackRecorder to repackage
	PackRecorder outputs
	Check the repackaged setup
Testing the repackaged Setup	Executing the MSI installation
	Test guidelines
Visual Designer and Advanced View	Overview
	Setting the editor options
	General information
	Work with application data
	Application paths
	Starting conditions
	Build options
	Validating the MSI package
Creating templates	
Practical Exercises of different Repackaging Scenarios	

Day 3	
Advanced Visual Designer and Advanced View Topics	Search for files, registry, INI files
	Table editor, features, components
	Handling limited environments
Installation Procedures of the Windows Installer	
Custom Actions	
Adapting an MSI Package	Overview of PackTailor
	Creating and Editing a Transform
	Working with Transform templates
Testing and Best Practices	
User Interface	Dialogues and adaptation to local conditions
Practical Exercises of different Repackaging Scenarios	

Migration Training AdminStudio to RayPack

RayAcademy – The right training for every area

The modular training concept of the RayAcademy offers a variety of qualification and advanced training courses and enables both a complete qualification process and targeted specializations in the area of Application Lifecycle Management.

The academy offers regular training courses for all products and services of Raynet and its partners within the Application Lifecycle Management. Raynet also has the world's first and unique training program in the field of software management and packaging consulting.

As a service provider for learning and training units Raynet develops current scenarios and adapts them to the in-house education management of the customers.

AZAV Certified Training Partner

As an accredited institution under the law on employment promotion, Raynet meets the requirements of the accreditation and licensing regulation for employment promotion – AZAV.

Therefore, Raynet offers measures of continuing education according to the fourth section of chapter three in book three of the Social Code.

About Raynet

Raynet GmbH is a leading and innovative service and solution provider in information technology and specialized in the architecture, implementation and operation of all tasks within Application Lifecycle Management. Raynet's Headquarters is in Paderborn, Germany and has additional locations throughout the region as well as locations in the USA, Poland and the UK.

For more than 20 years, Raynet supports hundreds of customers and partners with its products and solutions for worldwide enterprise application management projects. These include license management, software packaging, software deployment, migrations, client engineering and much more. Additionally, Raynet maintains and cultivates strong partnerships with leading companies in Application Lifecycle Management.
