Discovery and Inventory with RayVentory

With RayVentory, Raynet provides a solution that uses agents or so-called "Zero Touch Technology" to provide a comprehensive hardware and software scan so that the collecting of inventory data can be done quickly and reliably. RayVentory provides intelligent search and collecting of data from physical and virtual devices at low cost, as well as comprehensive reports on HW, SW, VMware, Hyper-V and Oracle DB servers.

In this training, participants will learn how to use RayVentory, necessary configurations and best practices for use in daily work.

Course	SAM-10 Discovery and Inventory with RayVentory
Duration	2 days
Language	English

Content of the training

Day 1	
Basics of Technical Asset Inventory	Definition
	Benefits
	Best Practices

	Network	
	Automation	
Inventory	Agentless	Remote
		Zero Touch
		Portable
		Automation
	Agent-based	Agent
		Portable
Data Hub, Collector and Connectors	Data processing	
	Data visualization / Reporting	
Practical exercises		

RayAcademy – The right training for every area

The modular training concept of the RayAcademy offers a variety of qualification and advanced training courses and enables both a complete qualification process and targeted specializations in the area of Application Lifecycle Management.

The academy offers regular training courses for all products and services of Raynet and its partners within the Application Lifecycle Management. Raynet also has the world's first and unique training program in the field of software management and packaging consulting.

As a service provider for learning and training units Raynet develops current scenarios and adapts them to the in-house education management of the customers.

AZAV Certified Training Partner

As an accredited institution under the law on employment promotion, Raynet meets the requirements of the accreditation and licensing regulation for employment promotion – AZAV.

Therefore, Raynet offers measures of continuing education according to the fourth section of chapter three in book three of the Social Code.

About Raynet

Raynet GmbH is a leading and innovative service and solution provider in information technology and specialized in the architecture, implementation and operation of all tasks within Application Lifecycle Management. Raynet's Headquarters is in Paderborn, Germany and has additional locations throughout the region as well as locations in the USA, Poland and the UK.

For more than 20 years, Raynet supports hundreds of customers and partners with its products and solutions for worldwide enterprise application management projects. These include license management, software packaging, software deployment, migrations, client engineering and much more. Additionally, Raynet maintains and cultivates strong partnerships with leading companies in Application Lifecycle Management.
