Best Practices for Workflow Management with RayFlow – Admin Training

RAYACADEMY[®]

RayFlow – More than a software packaging workflow. A workflow tool, which connects all software management components, ensures fluent work processes, integrates third-party products and which can also be customized.

In this training the participants will learn how to use a workflow management tool in order to improve your existing process. With the use of RayFlow the students are being thought how to speed up the packaging process by working along the specific phases.

Moreover, the training will show how to administrate the workflow, track changes and report results.
